British Election Study 2014-2023

Combined Waves 1-19 Internet Panel Codebook

{ University of Manchester
{ University of Oxford

Introduction

The British Election Study 2019-2023 is managed via a consortium of the University of Manchester and the University of Oxford. The Scientific Leadership Team is comprised of Professor Ed Fieldhouse, Professor Jane Green, Professor Geoff Evans, Dr Jonathan Mellon and Dr Christopher Prosser. The team is supported by Dr Roosmarijn de Geus and Jack Bailey. The previous 2014-2019 British Election Study team was also led by Professor Hermann Schmitt and Professor Cees van der Eijk.

Wave 1

30,590 respondents took wave 1. Wave 1 was conducted by YouGov between 20th February 2014 and 9th March 2014.

Wave 2

30,219 respondents took wave 2, 26,870 of these also took wave 1. The overall wave on wave retention was 88.9%. Wave 2 was conducted by YouGov between 22nd May 2014 and 25th June 2014.

Wave 3

27,839 respondents took wave 3 of the British Election Study, 24,016 of these also took wave 2. The overall wave on wave retention was 79.4%. In total there are 21,471 respondents who took all of the first three waves of the survey, 71.0% of the respondents who originally took wave 1. Wave 3 was conducted by YouGov between 19th September 2014 and 17th October 2014.

Wave 4

31,328 respondents took wave 4 of the British Election Study. 23,542 of these also took wave 3. The overall wave on wave retention was 84.6%. There are 18,958 respondents who took all of the first four waves of the survey, 62.7% of respondents who originally took wave 1. Wave 4 was conducted by YouGov between 4th March 2015 and 30th March 2015.

Wave 5

30,725 respondents took wave 5 of the British Election Study. 28,073 of these also took wave 4, an overall wave on wave retention rate of 89.6%. 17,673 respondents took all of the first five waves of the survey, 58.5% of respondents who originally took wave 1. Wave 5 was conducted by YouGov between 31st March 2015 and 6th May 2015.

Wave 6

30,027 respondents took wave 6 of the British Election Study. 27,926 of these also took wave 5, an overall wave on wave retention rate of 90.9%. 26,112 respondents took all three election waves (4,5 and 6). 16,799 respondents took all of the first six waves of the survey, 55.6% of respondents who originally took wave 1. Wave 6 was conducted by YouGov between 8th May 2015 and 26th May 2015.

Wave 7

30,895 respondents took wave 7 of the British Election Study. 21,044 of these also took wave 6, an overall wave on wave retention rate of 70.0%. 13,309 respondents took all of the first seven waves of the survey, 44.0% of respondents who originally took wave 1. Wave 7 was conducted by YouGov between 14th April 2016 and 4th May 2016.

Wave 8

33,502 respondents took wave 8 of the British Election Study. 24,432 of these also took wave 7, an overall wave on wave retention rate of 79.1%. 11,408 respondents took all of the first 8 waves of the survey, 37.7% of respondents who originally took wave 1. Wave 8 was conducted by YouGov between 6th May 2016 and 22nd June 2016.

Wave 9

30,036 respondents took wave 9 of the British Election Study. 27,555 of these also took wave 8, an overall wave on wave retention rate of 82.2%. 10,170 respondents took all of the first 9 waves of the survey, 33.6% of respondents who originally took wave 1. Wave 9 was conducted by YouGov between 24th June 2016 and 4th July 2016.

Wave 10

30,319 respondents took wave 10 of the British Election Study. 19,380 of these also took wave 9, an overall wave on wave retention rate of 64.5%. 7,351 respondents took all of the first 10 waves of the survey, 24.3% of respondents who originally took wave 1. Wave 10 was conducted by YouGov between 24th November 2016 and 12th December.

Wave 11

31,014 respondents took wave 11 of the British Election Study. 21,990 of these also took wave 10, an overall wave on wave retention rate of 70.9%. 6,472 respondents took all of the first 11 waves of the survey, 21.2% of respondents who originally took wave 1. Wave 11 was conducted by YouGov between 24th April 2017 and 3rd May 2017.

Wave 12

34,464 respondents took wave 12 of the British Election Study. 25,395 of these also took wave 11, an overall wave on wave retention rate of 81.9%. 5,832 respondents took all of the first 12 waves of the survey, 19.3% of respondents who originally took wave 1. Wave 12 was conducted by YouGov between 5th May 2017 and 7th June 2017.

Wave 13

31,196 respondents took wave 13 of the British Election Study. 26,669 of these also took wave 12, an overall wave on wave retention rate of 77.4%. 5,300 respondents took all of the first 13 waves of the survey, 17.5% of respondents who originally took wave 1. Wave 13 was conducted by YouGov between 9th June 2017 and 23rd June 2017.

Wave 14

31,063 respondents took wave 14 of the British Election Study. 20,393 of these also took wave 13, an overall wave on wave retention rate of 65.5%. 4,191 respondents took all of the first 14 waves of the survey, 13.9% of respondents who originally took wave 1. Wave 14 was conducted by YouGov between 4th May 2018 and 21st May 2018.

Wave 15

30,842 respondents took wave 15 of the British Election Study. 20,129 of these also took wave 14, an overall wave on wave retention rate of 64.8%. 3,206 respondents took all of the first 15 waves of the

survey, 10.6% of respondents who originally took wave 1. Wave 15 was conducted by YouGov between 11th March 2019 and 29th March 2019.

Wave 16

37,959 respondents took wave 16 of the British Election Study. 20,063 of these also took wave 15, an overall wave on wave retention rate of 65.1%. 2,427 respondents took all of the first 16 waves of the survey, 8% of respondents who originally took wave 1. Wave 16 also included a panel refresh, see below for more details. Wave 16 was conducted by YouGov between 24th May 2019 and 18th June 2019.

Wave 17

34,366 respondents took wave 17 of the British Election Study. 22,394 of these also took wave 16, an overall wave on wave retention rate of 59%. 1,882 respondents took all of the first 17 waves of the survey, 6.2% of respondents who originally took wave 1. Wave 17 was conducted by YouGov between 2019-11-01 and 2019-11-12.

Wave 18

37,825 respondents took wave 18 of the British Election Study. 25,425 of these also took wave 17, an overall wave on wave retention rate of 74%. 1,589 respondents took all of the first 18 waves of the survey, 5.2% of respondents who originally took wave 1. Wave 18 was conducted by YouGov between 2019-11-13 and 2019-12-11.

Wave 19

32,177 respondents took wave 19 of the British Election Study. 26,227 of these also took wave 18, an overall wave on wave retention rate of 69.3%. 1,394 respondents took all of the first 19 waves of the survey, 4.6% of respondents who originally took wave 1. Wave 19 was conducted by YouGov between 2019-12-13 and 2019-12-23.

Wave-on-wave retention

Respondents who drop out of one wave of the panel are re-invited to take later waves of the survey, and so the wave-on-wave retention rate for any pair of waves is considerably higher than the overall panel retention rate. For example while only 13.9% of wave 1 respondents have taken all 14 waves of the panel, 37.1% of wave 1 respondents took wave 14. A matrix of total respondents and retention rates (row percentages) for each pair of waves is shown below.

Weights and samples

Around 30,000 respondents were interviewed in each wave (referred to as the full sample). However, for waves 1-9 we also defined a smaller core sample of around 21,000 respondents in each wave that constitute a cross-sectional group which is more representative than the full sample (i.e. the range of weights is smaller than in the full sample).

For waves 1-9 we provide two cross-sectional weights for each wave, e.g. the full weight that covers all respondents who took the wave 6 survey (e.g. wt_full_W6) and the core weight that weights a smaller more representative sample of respondents (wt_core_W6). From wave 10 onwards we use an updated YouGov weighting schema (wt_W10) and no longer provide the core weights. For wave 10 and 11 we also provide weights using the original full weighting scheme for comparison. We recommend using the new weighting schema where it is available. We have also retrospectively calculated weights for previous panel waves using the new weighting schema.

The panel dataset includes a cumulative weight that covers respondents who have taken all waves so far in the study. Until wave 9, this weight is named with the total number of waves covered by the weight (e.g. wt_full_W1W2W3W4W5W6W7W8W9). To avoid increasingly long variable names, from wave 10 onwards we adopt a new naming convention, which covers the start and end waves of the cumulative weights (e.g. wt_full_W1_W13, which covers respondents who have taken all waves between wave 1 and wave 13).

We also include cumulative panel weights that cover smaller combinations of waves that were fielded around key electoral events:

- 2015 election pre-campaign-post waves (wt_full_W4W5W6)
- 2016 EU referendum pre-campaign-post-waves (wt_full_W7W8W9)
- 2017 election pre-campaign-post waves (wt_full_W7W8W9)

For the three campaign waves (waves 5, 8, and 12) we also provide daily weighting variables (e.g. wt_daily_W5) that cover respondents who took the survey on a particular day (see below for more information about the campaign wave sampling).

All of these weights are constructed at the regional level (i.e. Scotland, England, Wales and London are weighted separately to population values) and then adjusted to account for the oversampling of Scottish and Welsh voters.

Country items

In addition to the core items, there are sets of questions written specifically for each of the nations included in this survey: England, Scotland and Wales (note that Northern Ireland is not included in this survey due to the very different political situation there).

The largest country specific section is in Scotland, where the BES includes items inquiring about many aspects of the Scottish referendum campaign and preferences about independence.

To allow for a comparison of different devolved contexts, many of these questions are repeated in Wales.

Top up items

Top up items are asked to all respondents in the first wave that they take part in. These are generally demographic and attitudinal variables that are believed to be fairly stable over time.

These include:

- Occupation
- Parent's occupation
- Country of birth
- Highest education level
- Left-right values

While some of these can change, they do not need to be asked in every wave. These top up items are combined into multiwave variables that can be used to identify the wave in which respondents were asked these questions, which is the first wave indicated by the suffix in which the respondent appears. E.g. a question with a W1W2W3 suffix would mean that the variable is measured in wave 1 for all those who took the survey in wave 1, wave 2 for those who joined the survey in wave 2, wave 3 for those who joined the survey in wave 3 etc, whilst a variable with W3W4W5 would indicate that the question was asked to all respondents in wave 3, and then new respondents who joined in wave 4 and wave 5 in wave 4 and wave 5 respectively.

In addition to these variables, the BES also includes much of the information that YouGov routinely collects about all members of their panel.

- Age
- Highest qualification
- Home ownership
- Marital status
- Age left education (we already have highest qualification)
- Ethnicity
- Local authority and education authority
- Household income
- Personal income
- Household size
- Number of children in household
- Preferred daily newspaper
- Vote choice in 2010
- Religiosity
- Religious denomination
- Type of organization worked for

Having these measures from YouGov's existing data leaves more space for other important questions on the rest of the survey and avoids asking respondents for information they've already provided in the past. These variables have the prefix 'p_'. Profile variables are collected at intervals determined by YouGov and therefore should not be assumed to be measured at the time of a wave. Profile information with a wave identifier attached indicates that the profile data was the most up to date available at the time of that survey.

Playground items

The playground contains items that are only asked to subsets of respondents. Because of the number of questions asked to Scottish and Welsh respondents, initially these questions are only asked to English respondents. As survey space allowed, Scottish and Welsh respondents were added to the playground as well. These questions are primarily suggested by the community of academic users. Additionally, some questions from the previous round of the British Election Study in 2010 are included in the playground for comparability. Finally, the playground includes a number of items that the BES team felt are useful to include in the survey but didn't need to be asked to all respondents in every wave.

Campaign Waves (waves 5, 8 and 12)

Three campaign waves (wave 5, 8, and 12) were conducted as a rolling daily survey, with a subsample of respondents invited to complete the survey on each day of the campaign (the 2015 general election campaign in the case of wave 5, and the EU referendum campaign in the case of wave 8, and 2017 general election campaign in wave 12). There are three variables which record which day of the campaign a respondent completed the survey – CampaignDayW5, CampaignDayW8, and CampaignDayW12, which is the numeric day of the campaign period and respdateW5, respdateW8, and respdateW12, which is a formatted date variable. See above for information about the daily weighting variables (e.g. wt_daily_W5) available for the campaign wave.

Due to a technical error the party contact questions were not asked of those respondents who took the survey during the first weeks of the campaign in wave 5. It was asked of respondents who took the survey on and after April 24th 2015.

Panel refresh (wave 16)

The British Election Study Internet Panel offers huge advantages to studying British politics. So much of the current political situation can only be understood in terms of how individual voters are changing their attitudes and behaviours. The 16 waves of the panel conducted since 2014 offer an unparalleled picture of the volatile journey taken by British voters over this turbulent period.

However, panel data is not without its drawbacks. Taking all 16 waves of the panel means that a respondent would have spent more than five hours taking BES surveys over this time period. It is therefore a reasonable question to ask whether any normal person can be expected to do this, and whether even a normal person might be changed by spending so much time taking political surveys. In technical terms, these are the problems of panel attrition (politically engaged people are differentially likely to stay in a panel) and panel conditioning (taking surveys can change people's opinions or behaviours).

Unlike some studies, our panel is designed to remain cross-sectionally representative at each wave. That means that you should be able to take a sample taken in wave 13 (2017 post-election wave) and make inferences about the attitudes of people at that time. To do this, YouGov samples replacement respondents who resemble the kind of people who had dropped out. This means that the raw sample at each timepoint remains representative of the population in terms of the factors that YouGov quota samples from. However, the potential concern is that the respondents who do stay in the sample within these factors will be unusual.

For instance, imagine that the only factors that are important are whether you were below the age of 40 or above the age of 40 and political interest. Young people have lower levels of political interest than older people. For the purposes of this hypothetical we weight and sample for age but we do not observe political interest.

In wave 1, we start with half the sample over 40 and half below with both groups having reasonable levels of political interest. However, in wave 2, many of the politically disinterested will have dropped out. Because young people have lower political interest, we have lost more young people than old people. To make the sample representative again we would sample young and old voters in the correct proportions. However, the problem comes because, while the sample of young people who dropped out was disproportionately uninterested in politics, the sample who are used to replace them are just normally interested in politics. At wave 3, the same thing happens again, with politically disengaged people dropping out and those who are interested in politics staying in the panel. Repeating this over many waves will gradually make the remaining young people more and more interested in politics because the disinterested topups tend to drop out while the politically interested topups tend to stay in.

In practice, YouGov's sampling procedures include a lot more factors than just age, so this problem should be reduced substantially. Most importantly, the sampling and weighting accounts for education, past turnout and political attention, which are probably the variables of most concern.

It is therefore an open empirical question as to whether the Internet panel's cross-sectional samples are skewed by differential attrition in practice and, if so, by how much. To test whether this was a problem (and to provide a solution), in wave 16 we conducted a panel refresh.

The idea behind this was that a new sample of 18,000 respondents (18,217 in practice) would be drawn from YouGov's panel without regards to whether they had taken part in previous BES surveys in addition to the standard goal of maximising retention. By chance, many of these respondents would have taken previous surveys, but the idea is that this 18,217 person sample represents the sample that we would expect to achieve if we started an entirely new panel with YouGov.

Because the longitudinal element of the BES is obviously highly important we did not want to risk the panel refresh interfering with long-term panel retention. To achieve both of these goals, we increased the total sample size for wave 16 to 37,959. This allows us to achieve both normal retention and a fresh sample could be simultaneously.

While there is much work left to do comparing the samples, our initial analysis does not suggest that the standard cross-sectional wave 16 sample yields meaningfully different results than our fresh wave 16 sample. Comparisons for vote intention, likelihood to vote, European Parliament vote choice and turnout are shown below using YouGov's standard weighting:

Vote intention

Fresh Full

I would not vote	7.9	8.1
Conservative	11.7	12.1
Labour	14.3	14.1
Liberal Democrat	13.9	14.1

Leave the EU	39.8	39.8
I would/will not vote	6.6	6.8
Don't know	6.83	6.88
n	18,217	37,959

In each case, the weighted fresh and standard samples do not yield hugely differing results and there is no clear indication of a bias caused by the standard cycle of attrition and replenishment. The results of the panel refresh are encouraging for the ongoing quality of the panel. Panel attrition is not random and respondents who have taken very large numbers of waves should still be analysed cautiously. However, there is no evidence so far that the overall quality of the Internet panel is declining. There is no evidence that we should be more concerned about the representativeness of an internet panel cross-section wave conducted at wave 15 than at wave 2.

However, even if it does turn out later that some important factor is affected by panel attrition and conditioning, the fresh sample in wave 16 will ensure that there is a subsample of the panel that can be

used to diagnose this problem and correct it if needed. The indicator variable for the fresh sample is `fresh_sampleW16` in the panel and the relevant weight is `wt_fresh_W16`.

Data updates

The most recent waves of the the British Election Study may be subject to updates. Users are encouraged to check their variables carefully and report any problems they find.

Page: treatment1 if ScotExp_randID==1

One topic of the referendum debate has been whether an independent Scotland would be a member of the European Union. According to Alistair Darling from the ‘Better Together’ campaign, Scotland would have to leave the EU, reapply for membership and “negotiate its way back in”. But Alex Salmond rejects this claim, saying that “Scotland is already a member of the EU and that would continue”.

Page: treatment2 if ScotExp_randID==2

One topic of the referendum debate has been the currency that would be used in an independent Scotland. According to Alistair Darling from the ‘Better Together’ campaign, “it is now a simple fact that Scotland cannot keep the pound if we leave the UK”. But Alex Salmond describes this as a ‘scare tactic’, saying that Scotland would continue to use sterling which “is as much Scotland’s as the rest of the UK’s”.

manipCheck2

 - 2 Probably continue using the pound
 - 3 Not at all sure
 - 4 Probably not continue using the pound
 - 5 Definitely not continue using the pound
 - 99 Don’t know
-

Page: treatment3 if ScotExp_randID==3

One topic of the referendum debate has been whether Scottish households would be better or worse off under independence. According to Alistair Darling from the ‘Better Together’ campaign, the security and business opportunities offered by the Union makes Scots more prosperous. But Alex Salmond says that Scotland’s finances are “healthier than those of the UK as a whole” and so Scots would be better off under independence.

manipCheck3

HOW DO YOU WANT THE GOVERNMENT TO SPEND YOUR MONEY? The government spends public monies on many things in various areas, such as health, pensions, environment, and employment. In order to make sure that government spending is reasonable and provides value for money to society, it is important to understand how the general public feel about government spending on different areas. To do so, for the next part of the survey you will be presented with a number of different areas of government spending. We will then ask you to choose an area that you believe that the government should spend the ****most**** in and another area that the government should spend the ****least**** in.

page hudsonIntro

The following questions are about people you know yourself. These people might be family members, friends or acquaintances, but not people you may only have heard of, or do not know personally. The questions will ask if you currently know someone with a particular skill or occupation and how you would be able to reach that person.

resourceAccess1

DYNGRID

W3

Do you personally know anyone who knows a lot about the following things and who you could reach on short notice, say within a week? And how would you reach that person, via the internet (such as email, Twitter, Facebook) or in other ways (such as in person or over the phone)? Please answer all these questions, even if you would not need to get someone to do these kinds of things for you.

Do you personally know someone who...?

ROWS

SINGLE CHOICE

W2

Now thinking about the British economy...

Over the last year, it is estimated that the incomes of British taxpayers grew by an average of 2%. This means that for every £1000 in income that a person earned a year ago, they are now earning £1020 (after taking inflation into account).

Thinking about how much information regarding the British economy gets out to the public, how aware, if at all, do you think most people are about how incomes have changed in Britain recently?

Over the last year, it is estimated that the incomes of British taxpayers grew by an average of 2%. This means that for every £1000 in income that a person earned a year ago, they are now earning £1020 (after taking inflation into account).

Not everyone in Britain has seen their income grow by the same amount. The graph below shows how incomes have changed for people of different incomes.

The graph divides the population up into four groups based on income. Each group contains one quarter (25%) of the population. In the graph, we can see how much incomes have gone up or down for individuals in the poorest quarter, the lower-middle quarter, the upper-middle quarter, and the richest quarter of the population.

Thinking about how much information regarding the British economy gets out to the public, how aware, if at all, do you think most people are about how incomes have changed in Britain recently?

EU referendum vote intention

Note on the EU referendum questions:

During waves 7 and 8, respondents were asked which way they intended to vote in the EU referendum and then respondents who said don't know were asked a follow-up squeeze question. In wave 8 respondents were also asked about whether they had applied for a postal vote and whether they had voted with it.

euRefVote- Combines the squeezed and unsqueezed responses and postal votes where applicable

euRefVoteUnsqueeze- Just the unsqueezed responses (excluding postal votes)

euSqueeze- Just the squeezed responses

euRefVotePost- just the postal vote responses

We will now ask you to imagine four different situations. Each time we will ask you to choose between a guaranteed payment and an even (50-50) chance of getting \$300 or getting nothing.

Please imagine the following situation. You can choose between a guaranteed payment of...., or having an even (50-50) chance of getting £300 or getting nothing.

(The first round is a choice between a 50/50 chance of £300 or a guaranteed payment of £160. Subsequent rounds are determined by choices made in the previous rounds. The routing of the rounds and the final score as coded in the riskScale variable is shown below, higher scores mean more risk taking)
